

# WORLDWIDE PROMOTION OF THE STRZELECKI EBOOK

March 12, 1840. Three o'clock in the afternoon.

The highest peak of the Snowy Mountains is climbed by Paweł Edmund Strzelecki.

Can you see him? Here on the "roof" of Australia he takes measurements, draws, takes notes, and documents everything that is needed to put the Mountain named after Kościuszko on the map of the world.

Paweł, it probably didn't occur to you that there would be competitions in the future as a tribute to your achievements. We have chosen this memorable date (12 March) and time (three o'clock in the afternoon) to officially announce to the whole world that our joint work, the competition Ebook, is now available. We dream that it will become a convenient tool and a rich source of information for readers, educators and activists of cultural institutions to promote you, Paweł.
